

Which Transcription Service is Right For You?

ASR (Automatic Speech Recognition) vs. Human Transcription

Is your recording good quality?

(No background noise or people speaking over each other?)

Yes, crystal clear

Hmm, could be better

Multiple speakers?

No, just one

Yes, more than one

Do you need to distinguish between the speakers?

Nope, I can muddle through

Of, course!

Regional accents?

No

Yes

What type of transcription?

Every single word, um, ah, stutter & repetition

I don't want to clean/edit my transcript

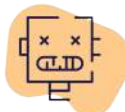

How accurate does it need to be?

Budget is my priority, I've got time spare to do some editing

I need it to be 99%+ accurate

ASR

Human Transcription
